The suspension or abandonment of work shall be defined as failing to obtain a formal approval of any required inspection as specified in Section 105.2 of this code within a 180 day time period. The application for an extension shall state the reason for the extension and identify conditions beyond the control of the applicant which justify the extension. The application shall be reviewed by the Building Official and a decision to grant an extension or not shall be based upon the merits of the written request for the extension. No additional permit fees, other than the application fee of \$73.00, shall be charged. Payment of the \$73.00 application fee shall not automatically grant an extension. Permits which have become invalid shall pay a renewal fee of 50% of the original permit fee when the permit has been expired for up to one (1) year. When a permit has been expired for a period in excess of one (1) year, the renewal fee shall be 100% of the original permit fee.

The Building Official may extend the time for action by the applicant for a period not exceeding 180 days on written request by the applicant showing that circumstances beyond the control of the applicant have prevented action from being taken. An application may be extended one or more times by the building official for additional periods not exceeding 180 days each. An application shall not be extended if this code or any other pertinent laws or ordinances have been amended subsequent to the date of application.

An application for a permit may only be extended if a written request for an extension is received prior to the expiration of the permit application and a nonrefundable application fee of \$73.00 is paid. The application for an extension shall state the reason for the extension and identify conditions beyond the control of the applicant which justify the extension. The application shall be reviewed by the Building Official and a decision to grant an extension or not shall be based upon the merits of the written request for the extension. A special investigation shall be made either by the building official, or a building inspector. Prior to any special inspection, all concealed structural and non-structural items shall be exposed so either the building official, or the inspector can conduct an accurate assessment of the non-permitted construction. The items to be exposed

shall include, but not limited to the foundation, framing, electrical, plumbing and mechanical.

104.5.2.2 Fee. An investigation fee, in addition to the permit, shall be collected whether or not a permit is then or subsequently issued. The investigation fee shall be equal to the amount of the permit fee that would be required by this code if a permit were to be issued. The payment of such investigation fee shall not exempt any person from compliance with all other provisions of this code or from any penalty prescribed by law.

104.5.2.3 Emergency Work. The investigation fee shall not apply to emergency work when it shall be demonstrated to the satisfaction of the Administrative Authority that such work was urgently necessary and that it was not practical to obtain a permit therefore before commencement of the work. In all such cases, a permit must be obtained as soon as it is practical to do so, and if there be an unreasonable delay in obtaining such permit, an investigation fee as herein provided shall be charged.

Section 104.5.3 Fee Refunds is hereby amended to read as follows:

Section 105.2.6 Reinspections is hereby amended to read as follows:

105.2.6 Reinspections. The Authority Having Jurisdiction shall have the authority to assess a reinspection fee for each inspection or reinspection when such portion of work for which inspection is requested is not complete or when required corrections have not been made. Reinspection fees may also be assessed when the approved plans are not readily available to the inspector, or failure to provide access on the date for which inspection is requested or for deviating from plans requiring the approval of the Building Official or requesting a reinspection of the same item three or more times.

This provision is not to be interpreted as requiring reinspection fees the first time a job is rejected for failure to comply with the requirements of this code, but as controlling the practice of calling for inspections before the job is ready for inspection or reinspection.

To obtain reinspection, the applicant shall file an application therefore in writing upon a form furnished for that purpose and pay the reinspection fee established by resolution adopted by the City Council.

In instances where reinspection fees have been assessed, no additional inspection of the work will be performed until the required fees have been paid.

Section 105.2.7 Extra Inspections is added to read as follows:

105.2.7 Extra inspections: When extra inspections are necessary by reason of deficient or defective work, or otherwise through fault or error on the part of the holder of the permit or on the part of his employees, only one such extra inspection shall be made under the regular fees as herein prescribed; and the holder of the permit shall be entirely responsible for each and every subsequent extra visit or inspection.
